Technical information for SELVE motor setting switch

Article number	290103	290106	290109	290690	290100
	290101	290111	290112	290107	290108

Designated use

This motor setting switch has to be used exclusively for the setting-up operation and adjustment of SELVE motors.

Please pay attention to the original installation instruction and operation manual of the respective motor.

The motor setting switch has to be removed after start of operation.

For the start of operation:

Attention!

Electronic works and electrical connections may only be executed by an electrically qualified person.

The effective regulations for the electric installation are to be respected and to be observed. Before installation the power supply line has to be de-energized.

The motor setting switch has to be protected against moisture!

Use according to the type of motor a motor setting switch with four or five connecting terminals and connect the connecting wire of the motor with the ones that are same colored of the motor setting switch.
